WORK EXPERIENCE

Jindal Aluminium Limited – Power BI Developer - Business Operations

Apr 2022- Present

- Developed 60+ MIS reports in Power BI, providing real-time insights into supply chain, sales, human resources, import, export, finance, legal, costing, quality, maintenance, production performance, and the status of SAP enhancement projects and customized web application projects.
- Developed a Trigger Management System across cross-functional departments to send reminders before the expiry date of subscriptions or AMC renewals using Power Apps and Power Automate.
- Analyzed customer complaints using Power BI and SQL, leading to a 30% reduction in complaints.
- Implemented a Civil Works Daily Tracker and Project Management Progress Status & Trigger Management System using Power Apps and Power Automate to monitor project progress and enable automated reminders.
- Developed and implemented SAP enhancement projects across departments in SAP MM, SD, and PP modules.
- Integrated SAP HANA and ERP data sources with BI tools to enable continuous data flow for real-time analysis.
- Played a pivotal role in the successful execution of the Automation Project OMS and CIMS. Responsibilities included gathering requirements, securing development approvals, and conducting User Acceptance Testing.

Polybond India Pvt Ltd – Graduate Trainee

Aug 2021- Mar 2022

- Analyzed operations and parameter verification, ensuring optimal performance and quality standards.

PROJECTS

Process Digitalization & Data Analysis:

Implemented Trigger Management System and Business Required Apps, SAP validation projects, automated PPC planning, and implemented web applications to analyze data and streamline automation.

Automation Implementation:

Successfully implemented Order Management System, Manufacturing Execution System and Semi Auto Label Sticker.

Dashboard Development:

Created dashboards in Power BI and SQL to track daily production performance, sales, exports, imports, customer complaints, PR to PO delays, payment due days, cost analysis, dead stock, non-moving materials, die failures, material readiness and consumption, inventory stock, HR metrics, supply chain item tracking, and inventory management. - [Projects](#)
